## *Future Thinkers* *Month of science*

The primary objective of Science Month was to foster a deeper interest in sciences among our students through hands-on activities, interactive workshops, and insightful discussions. We aim to create an environment that encourages curiosity and critical thinking.

Here is a brief overview of the activities and initiatives we organised as part of science month:

### INTRODUCTORY ASSEMBLY

Grade 11 students performed a skit on the successful launch of Chandrayaan 3.

The whole journey of ISRO from the first rocket launch in 1963 till the present success of Chandrayaan 3 and future endeavours to Sun, Aditya L1 was enacted.

There were classroom activities that was conducted as part of the science month.

Grade 7 activities were space craft or satellite model building, symposium on eat right and get active and ecology poster.

Grade 8 activities were model making on emirates lunar mission, symposium on eat right and get active and poster making on vision 2050 of UAE.

Round of applause for these remarkable minds who have made us proud on the global stage:

**DOHA:**

Aliya Nujum Navaz  
Judith Susan Bobby  
Zaynah Sahid Malik

They represented the UAE at the World Scholars Cup (WSC) Doha Global Round, showcasing their brilliance and passion for knowledge!

# Congratulations

Congratulations to Ibrahim Shaharyar and Sara Shaharyar for their outstanding achievement as the Toppers of the ADNOC STEM for Life Bio Blitz World Environment Day Challenge! Winning an iPad and a certificate is a testament to their dedication and excellence in this competition. Well done!

# Congratulations
