

A Silver Lining: Shaping a New Generation of Achievers

The Summer Vacation is here, again!

Although our children have been homebound for more than a year now, this is the time they excitedly look forward to. A big Shout Out to our kids for their resilience and courage to endure this challenging time with a smile on their faces. We extend our gratitude to our dear parents for their help in making teaching learning process interesting and a great success. This pandemic has taught us to adopt to uncertainty, to become the flow and change accordingly. Yet it has also taught us to hope and know that there is a light at the end of the tunnel.. This break is also a great opportunity to spend quality time together as a family. We have a heart full of emotions concerning the adaptability of the Alain Juniors School educators during this time. It is their continued passion for delivering their love to the students that is so heart-warming and inspirational. They have had just a limited time to shift their ways of teaching and adapt to digital learning.

We express my gratitude to the AJ parents who have been there to ensure their children continue to receive their education by sitting with their kids, supporting them and trusting the teachers with distance learning. The parents have been able to spend more time with their children. Also, the teachers have been there to offer encouragement and emotional support to help ensure that education reaches beyond the four corners of the classroom.

Seeing the parents working with their children gave us so much joy. This is not only because the students have access to education but, also because their parents have been subconsciously shaping their children to become affectionate, kind-hearted, patient, diligent, strong-willed, resourceful, responsible and compassionate. These are the silver linings that oddly make this time serendipitous. This time showed us the fragility of lives, but this has taught us and our children so many wonderful values. Rest assured that these children will conquer education with flying colors!

To the students, parents, faculty and administration of AJ - Thank you. We are all in this together.

Our new distance learning chapter has opened our eyes towards the truly amazing talents that our students in Alain Juniors School hold.

We hope that you will enjoy a wonderful and well-deserved summer break. We also hope that our students will come back relaxed, recharged and continue their educational journey.

We are so delighted that you are all part of our Amazing Learning community and we welcome and value your positive energy. We appreciate your dedication to excellence in education. We work with your children to build an amazing community and lifelong memories.

Besides our prime goal to meet every child's needs as an individual, our second most important goal is to teach students to develop healthy living habits that will last a lifetime. We accomplish that by having students participate in a wide variety of activities, sports and challenges that will increase their physical, social, and mental abilities. Furthermore, we aim to instill characteristics like teamwork, camaraderie and cooperation. We look forward to providing a safe, fun, and motivating sports program that will encourage all students to participate have fun and try their best.

All the very best. Have a safe & Happy vacation!

We take you on a short tour of the achievements of our students from the start of the Academic year 2021-22 – (April to June.)

Kindly check the attachment.

Note: The School re-opens after summer vacation on Sunday, 29th August 2021.

Best wishes

Updates

Free Course : **Develop sophisticated apps with no-coding**

After completing the course you will be able to develop apps similar to Facebook, WhatsApp, Amazon shopping, and any other idea that you may have. The course will take you to a journey to develop a complete App start from the idea to deployment. Artificial intelligence and advance data processing has changed even coding and programming. The emphasis started to change from focus on syntax and code to focus on logic, structure, and workflow. In this courses, we will use bubble platform as our development environment. Bubble has a strong community of developers, rich plug-in market, full cloud and backend services.

Duration: 4th July 2021 to 14th July 2021.

Timing: 4 PM to 6 PM UAE time.
