

Dear students,

Winter break is the most awaited period during school days. It is the time for a break from the tiring and hectic schedule of academic work. It is when students can sharpen their skills, develop their hobbies and spend quality time with friends and relatives. Apart from fun filled activities it is indeed an opportunity to excel in academics as it provides extra time to focus on one's weak areas.

Make your holidays more fun filled with the following ideas:

1. Wake up early: There is no sleeping all day and staying up all night. Decide the previous day when you will get out of bed, then make sure follow through.
2. Learning does not stop when school is out: Go to a camp and learn something new. Try something different that you know nothing whatsoever about, and you will gain a new skill and possibly find a lifelong love.
3. Don't stick to electronic gadgets: As for every hour spent with electronic gadgets you have to give one hour of play so get out and play outside
4. If you are bored: You will get easily bored during the winter. Try helping your parents in household chores.
5. Give time to academics: while indulging in fun activities and more, at least spend one hour daily on academics so when the school resumes, you'll be grateful that your academic knowledge and skills have not deteriorated.
6. Spend quality time with family: Make sure to spend time with your parents and grandparents. Play board games and enjoy outings with them.
7. Do something for Mother Earth: such as save water & energy and plant trees
8. Explore outside: Being outside in nature is important for all of us. So enjoy!

Holiday's Homework has been attached with these instructions to be done in winter vacations.

General Instructions:-

- a. The holiday homework should be handmade and well presented.
- b. Complete the assignment on A 4 papers and posters on Bristol board.
