SLUMBER PARTY

To develop camaraderie and rapport to the students, KG conducted Slumber Party last 26th September 2019. Teachers prepared stories to be read to the students. Students really enjoyed and had fun. Here are some captured happy moments:

Kids at Work

Play allows children to use their creativity while developing their imagination, physical, cognitive and emotional strength. Play is important to healthy brain development. It is through play that children at a very early age engage and interact in the world around them. Play allows children to create and explore a world they can master. Conquering their fears while practicing adult roles. As they master their world, play helps children develop new competencies that lead to enhance confidence and the resiliency they will need to face future challenges. Undirected play allows children learn how to work in groups, to share to negotiate, to resolve conflicts and to learn self advocacy skills. When play is allowed to be child driven, children practice decision-making skills, move at their own pace, discover their areas of interest and ultimately engage fully in the passions they wish to pursue.
